Arteriosclerosis and Thrombosis
A Journal of Vascular Biology

Volume 13 Number 7 July 1993

Original Contributions

Effects of Thrombocytopenia and Shear Rate on Neutrophil and Platelet Deposition on Endothelial and Medial Arterial Surfaces
Yahye Merhi, Jules Y.T. Lam, Lucie L. Lacoste, Jean-Gilles Latour, Robert Guidolin, and David Waters

Dietary Monounsaturated Fatty Acids Enhance Cholesterol Efflux From Human Fibroblasts: Relation to Fluidity, Phospholipid Fatty Acid Composition, Overall Composition, and Size of HDL

Adipocyte β-Adrenoceptor Sensitivity Influences Plasma Lipid Levels
Peter Amer, Hans Wahrenberg, Fredrik Lönnqvist, and Bo Angelin

Variable Expression of the Mutation In Familial Defective Apolipoprotein B-100
J.J. Gallagher and N.B. Myant

Evidence That Turbulence Is Not the Cause of Poststenotic Dilatation In Rabbit Carotid Arteries
Matadil Ojha and B. Lowell Langille

Comparison of Gene Expression In Bovine Aortic Endothelium In Vivo Versus In Vitro: Differences In Growth Regulatory Molecules
Lucy Liaw and Stephen M. Schwartz

Responsiveness of Aortic Smooth Muscle Cells to Soluble Growth Mediators Is Influenced by Cell-Matrix Contact
Michael Thie, Bärbel Harrach, Elke Schönher, Hans Kresse, Horst Robenek, and Jürgen Rauterberg

Hypoellipidemlc Activity of HOE-402 Is Mediated by Stimulation of the LDL Receptor Pathway
M. Huettlinger, M. Herrmann, H. Goldenberg, E. Granzer, and M. Leineweber

Oxidized LDL-Induced Leukocyte/Endothelium Interaction In Vivo Involves the Receptor for Platelet-Activating Factor
H.A. Lehr, J. Seemöller, C. Hüblner, M.D. Menger, and K. Messmer

Intimal Thickening and Medial Necrosis In Allograft Arteriosclerosis (Chronic Rejection) Are Independently Regulated
Ari Mennander, Timo Paavonen, and Pekka Häyry

Platelet-Derived Growth Factor and Transforming Growth Factor-β Differentially Affect the Synthesis of Biglycan and Decorin By Monkey Arterial Smooth Muscle Cells
Elke Schönher, Hannu T. Järvelläinen, Michael G. Kinsella, Linda J. Sandell, and Thomas N. Wight

Lipoprotein[a] Concentrations and Apolipoprotein[a] Phenotypes In Caucasians and African Americans: The CARDIA Study
Santcia M. Marcovina, John J. Albers, David R. Jacobs, Jr, Laura L. Perkins, Corp E. Lewis, Barbara V. Howard, and Peter Savage
Lipoprotein Compositional Abnormalities and Insulin Resistance in Type II Diabetic Patients With Mild Hyperlipidemia

Fluorescence Flow Cytometry of Human Leukocytes In the Detection of LDL Receptor Defects In the Differential Diagnosis of Hypercholesterolemia
Gerd Schmitz, Thomas Brüning, Eva Kovacs, and Stefan Barlage ......................................................... 1053

Anticoagulant Activity of Tissue Factor Pathway Inhibitor In Human Plasma Is Preferentially Associated With Dense Subspecies of LDL and HDL and With Lp(a)
Philippe Lesnik, Allin Vonica, Maryse Gudrin, Martine Moreau, and M. John Chapman ....................... 1066

Characterization of Six Patients Who Are Double Heterozygotes for Familial Hypercholesterolemia and Familial Defective Apo B-100

Effects of Prostacyclin Analogues on Human Endothelial Cell Tissue Factor Expression
David J. Crutchley, Lobelia B. Conanan, Andy W. Toledo, Denis E. Solomon, and Benito G. Que ............... 1082

Localization and Production of Plasminogen Activator Inhibitor-1 In Human Healthy and Atherosclerotic Arteries
Florea Lupu, Gabriela E. Bergonzelli, Dominik A. Heim, Elisabeth Cousin, Claude Y. Genton,
Fedor Bachmann, and Egbert K. O. Krulthof ......................................................................................... 1090

Interaction of Lp(a) and of Apo(a) With Liver Cells
Gert M. Koestner .................................................................................................................................. 1101

Stable Isotopes Show a Direct Relation Between VLDL ApoB Overproduction and Serum Triglyceride Levels and Indicate a Metabolically and Biochemically Coherent Basis for Familial Combined Hyperlipidemia
Soundararajan Venkatesan, Paul Cullen, Paul Pacy, David Halliday, and James Scott ......................... 1110

Recombinant Human Thrombomodulin Attenuates Human Endothelial Cell Activation by Human Thrombin
John F. Parkinson, Nils U. Bang, and Joe G.N. Garcia ........................................................................... 1119

Instructions to Authors ................................................................. A1124
News From the American Heart Association .......................................................... A1125
AHA Meetings Calendar .......................................................................................... A1126
