Arteriosclerosis and Thrombosis
A Journal of Vascular Biology

Volume 14, Number 10  October 1994

Review
Receptors and Nonenzymatic Glycation

Original Contributions
L-Arginine and Platelet Reactivity
Granulocyte-Macrophage Colony-Stimulating Factor Lowers Cholesterol
Chylomicron Clearance and Atherogenesis in Mice Overexpressing ApoE4
ApoE and Heterozygous Familial Hypercholesterolemia
Lp(a) Concentration and Apo(a) Isoform Size
Pravastatin in Familial Combined Hyperlipidemia
Genetic and Environmental Factors in Combined Hyperlipidemia
Lipid Transfer Protein Activities in Male Smokers
Tamoxifen and Estrogen Lower Lp(a)
Distribution of LpA-I in Normolipidemic Men and Women
n-3 Fatty Acids Inhibit TF Activity in Human Monocytes
Apo(a) Phenotypes in Children
EARS Study: Apo E Polymorphism and CHD
Bruneck Study: Iron Stores and Atherosclerosis Risk
Finnish Study: Common Carotid Atherosclerosis
Zutphen Elderly Study: Insulin and CHD
Osteopontin in Coronary Atherosclerosis
Apo A-I and A-II Gene Regulation by Retinoic Acid
Antioxidants Inhibit Monocyte Adhesion
Alternating $\alpha,\beta$ Pentapartite Structure in ApoB-100

"Information you need from the authority you trust"

Outstanding monographs selected by the AHA for their timeliness and contribution to the field of cardiology

American Heart Association

AHA Monograph Series

Fighting Heart Disease and Stroke

Due November 1994!

- ATRIAL ARRHYTHMIAS: State of the Art
  Edited By: John P. DiMarco, MD
  Eric N. Prystowsky, MD
  384 pp. (approx.), 106 illus. (1 color), 23 tables,
  0-87993-604-5, November 1994 (approx.) $70.00
  Standing Order Discount $63.00

Available Now!

- CARDIOVASCULAR RESPONSE TO EXERCISE
  Edited By: Gerald F. Fletcher, MD
  Associate Editors: Peter Wood, MD, James Scheuer, MD,
  Colin M. Bloor, MD, Victor Froelich, MD,
  Michael Crawford, MD, James Muller, MD
  464 pp., 103 illus., 23 tables, 0-87993-559-6, 1993 $75.00
  Standing Order Discount $67.50

- MANAGEMENT ISSUES IN HEART FAILURE
  Edited By: Gemma T. Kennedy, RN, PhD
  Michael H. Crawford, MD
  200 pp., 21 illus., 11 tables, 0-87993-586-3, 1994 $27.00
  Standing Order Discount $24.30

- CARDIOVASCULAR APPLICATIONS OF MAGNETIC RESONANCE
  Edited By: Gerald M. Pohost, MD
  480 pp., 217 illus., 22 tables, 0-87993-548-0, 1993 $86.00
  Standing Order Discount $77.40

ORDER FORM - 10% Discount for Standing Order

Toll Free 1-800-877-8761 - Fax 914-273-1015

☐ YES! I wish to place a standing order (s/o) for the series and receive
  a 10% discount on each book. Examine the book for 30 days. If you
  are not completely satisfied, return it and we'll refund the purchase
  price!

☐ DiMarco/#6045, individually (approx.) $70.00
☐ Fletcher/#5596, individually $75.00
☐ Kennedy/#5863, individually $27.00
☐ Pohost/#5460, individually $86.00

☐ Check _ VISA _ AE _ MC

☐ Bill my institution (a P.O. must be enclosed).

American Heart Association

Public Access Defibrillation:
A New Strategy To Prevent Sudden Death

An American Heart Association Conference
Focused on the Interface Between Medicine,
Engineering, Public Health and Industry

- Integration of Automatic External Defibrillation
  Into the Community
- Current and Developing Automatic External
  Defibrillator Technology
- Cost Effectiveness of Early Defibrillation
- Return on Investment for Successful New
  Products
- Moving AEDs Into the Domain of Consumer
  Electronics
- Behavioral Aspects of Early Defibrillation
- Integration of Defibrillation Into Modern
  Communications Technology
- Public Policy and Legal Considerations for
  Next Generation of Devices
- Integration of Automatic External Defibrillation
  Into Healthcare of the Future

Lowfat, Low Cholesterol Cookbook

From chicken fajitas to pesto to
mocha cheesecake, here are 200
recipes that combine sound
nutrition with delicious cooking.
For the first time, the nation's foremost
authority on the prevention of heart disease
has developed a low-fat, low-cholesterol cookbook. Each recipe
is accompanied by detailed nutritional
information.

More than a cookbook, this is a source
book for managing cholesterol in your
life. And the 200 mouth-watering reci-
pees make eating a pleasure for anyone who has
a heart.
A new book entitled Hypertension Primer is now available from the American Heart Association. The Primer's 370 pages, and covers all aspects of hypertension from basic science to clinical hypertension. It is also a useful adjunct text for medical students. The editors are Joseph L. Izzo, MD and Henry R. Black, MD. There are 156 short, concise chapters divided into five major sections. The five sections and section editors are: Biochemistry and Cell Biology (Theodore L. Goodfriend, MD); Pathophysiology (James R. Sowers, MD and Franz H. Messerli, MD); Epidemiology, Prevention and Control (Jeffrey A. Cutler, MD, MPH); Evaluation of the Hypertensive Patient (Sheldon G. Sheps, MD; and Treatment of the Hypertensive Patient (Donald Vidt, MD). Each chapter is cross-referenced with other linked areas in different sections of the book. The Primer also features extensive diagrams and tables.

The price is $34.95 plus $3.00 shipping and handling, for both domestic and foreign orders. Foreign shipments will be by surface mail.
