ARTERIOSCLEROSIS, THROMBOSIS, AND VASCULAR BIOLOGY (ISSN 1079-5642) is published monthly by Lippincott Williams & Wilkins, at 16522 Hunters Green Parkway, Hagerstown, MD 21740. Business offices are located at Two Commerce Square, 2001 Market St., Philadelphia, PA 19103. Production offices are located at 351 West Camden Street, Baltimore, MD 21201-2436. For institutional rates in Japan, contact Igaku-Shoin MYW, Ltd., 3-23-14 Hongo, Bunkyo-ku, Tokyo 113, Japan. Individuals may subscribe for their personal use at the following annual rates: $299 for members of an American Heart Association scientific council and $510 for nonmembers; international: $359 for members of an American Heart Association scientific council and $610 for nonmembers. Periodicals postage paid at Hagerstown, MD and additional mailing offices. POSTMASTER: Send address changes to ARTERIOSCLEROSIS, THROMBOSIS, AND VASCULAR BIOLOGY, American Heart Association, Lippincott Williams & Wilkins, 12107 Insurance Way, Hagerstown, MD 21740.

Volume 34 Number 2 February 2014

Key: VB=Vascular Biology  AL=Atherosclerosis/Lipoproteins  TH=Thrombosis

Editorials

When the Vessels Use Their Brain for Therapeutic Revascularization
Jean-Sébastien Silvestre ................................................................. 237
See accompanying article on page 408

Apelin Signaling: New G Protein–Coupled Receptor Pathway in Lymphatic Vascular Development
Natalie O. Karpinich, Kathleen M. Caron .................................................. 239
See accompanying article on page 338

Liver X Receptors and Atherosclerosis: It Is Not All Cholesterol
Irena D. Ignatova, Ira G. Schulman ...................................................... 242
See accompanying article on page 279

Brief Review

AL HIV, Inflammation, and Calcium in Atherosclerosis
Sadeep Shrestha, Marguerite R. Irvin, Carl Grunfeld, Donna K. Arnett ................................................................. 244

Basic Sciences

AL A Regulator of Secretory Vesicle Size, Kelch-Like Protein 12, Facilitates the Secretion of Apolipoprotein B100 and Very-Low-Density Lipoproteins—Brief Report

AL Deficiency of Endogenous Acute Phase Serum Amyloid A Does Not Affect Atherosclerotic Lesions in Apolipoprotein E–Deficient Mice
Maria C. De Beer, Joanne M. Wroblewski, Victoria P. Noffsinger, Debra L. Rateri, Deborah A. Howatt, Anju Balakrishnan, Ailing Ji, Preetha Shridas, Joel C. Thompson, Deney R. van der Westhuysen, Lisa R. Tannock, Alan Daugherty, Nancy R. Webb, Frederick C. De Beer ................................................................. 255
AL Apolipoprotein A-I Protection Against Atherosclerosis Is Dependent on Genetic Background
Timothy J. Sontag, Paulette A. Krishack, John R. Lukens, Clarissa V. Bhanvadia, Godfrey S. Getz, Catherine A. Reardon ................................................................. 262

AL A Novel Mouse Model of Aortic Valve Stenosis Induced by Direct Wire Injury
Shintaro Honda, Takaya Miyamoto, Tetsu Watanabe, Taro Narumi, Shinpei Kadowaki, Yuki Honda, Yoichiro Otaki, Hiromasa Hasegawa, Shunsuke Netu, Akira Funayama, Mitsunori Ishino, Satoshi Nishiyama, Hiroki Takahashi, Takanori Arimoto, Tetsuro Shishido, Takehiko Miyashita, Isao Kubota ..................................................... 270

AL Activation of Liver X Receptor Decreases Atherosclerosis in Ldlr<−/− Mice in the Absence of ATP-Binding Cassette Transporters A1 and G1 in Myeloid Cells
Mojdeh S. Kappus, Andrew J. Murphy, Sandra Abramowicz, Vasisizwe Ntonga, Carrie L. Welch, Alan R. Tall, Marit Westerterp ......................................................... 279
See accompanying editorial on page 242

VB G-Protein–Coupled Receptor 91 and Succinate Are Key Contributors in Neonatal Postcerebral Hypoxia-Ischemia Recovery
David Hamel, Melanie Sanchez, François Duhamel, Olivier Roy, Jean-Claude Honoré, Baraa Noueihed, Tianwei Zhou, Mathieu Nadeau-Vallée, Xin Hou, Jean-Claude Lavoie, Grant Mitchell, Orval A. Mamer, Sylvain Chemtob ........................................ 285

VB Novel Tubulin Antagonist Pretubulysin Displays Antivascular Properties In Vitro and In Vivo
Verena K. Kretzschmann, Donata Gellrich, Angelika Ullrich, Stefan Zahler, Angelika M. Vollmar, Uli Kazmaier, Robert Fürst .......................................................... 294

VB p21-Dependent Protective Effects of a Carbon Monoxide–Releasing Molecule-3 in Pulmonary Hypertension
Sharig Abid, Amal Houssaini, Nathalie Mouraret, Elisabeth Marcos, Valerie Amsellem, Feng Wan, Jean Luc Dubois-Randé, Geneviève Derumeaux, Jorge Boczkowski, Roberto Motterlini, Serge Adnot .................. 304

VB Erythrocyte-Derived Microvesicles Amplify Systemic Inflammation by Thrombin-Dependent Activation of Complement
Daniel Zecher, Arun Cumpelik, Jürg A. Schifferli ............................................................. 313

VB Multiple-Site Activation of the Cysteinyl Leukotriene Receptor 2 Is Required for Exacerbation of Ischemia/Reperfusion Injury
Nathan C. Ni, Laurel L. Ballantyne, Jeffrey D. Mewburn, Colin D. Funk ......................................... 321

VB Genetic Reduction of Vascular Endothelial Growth Factor Receptor 2 Rescues Aberrant Angiogenesis Caused by Epsin Deficiency
Kandice L. Tessneer, Satish Pasula, Xiaofeng Cai, Yunzhou Dong, John McManus, Xiaolei Liu, Lili Yu, Scott Hahn, Baojun Chang, Yiyuan Chen, Courtney Griffin, Lijun Xia, Ralf H. Adams, Hong Chen ..................... 331

VB Essential Role of Apelin Signaling During Lympathic Development in Zebrafish
See accompanying editorial on page 239

VB Insulin-Regulated Protein Palmitoylation Impacts Endothelial Cell Function
Xiaochao Wei, Haowei Song, Clay F. Semenovich ................................................................. 346

VB Aldosterone Promotes Vascular Remodeling by Direct Effects on Smooth Muscle Cell Mineralocorticoid Receptors
Dafina Pruthi, Amy McCurley, Mark Aronovitz, Carol Galayda, S. Ananth Karumanchi, Iris Z. Jaffe ......................... 355
Translational Sciences

AL Inflammatory Stress Induces Statin Resistance by Disrupting 3-Hydroxy-3-Methylglutaryl-CoA Reductase Feedback Regulation
Yaxi Chen, Halcyon Ku, Lei Zhao, David C. Wheeler, Lung-Chih Li, Qing Li, Zac Varghese, John F. Moorhead, Stephen H. Powis, Ailong Huang, Xiong Z. Ruan ................................................................. 365

TH Deletion of Cysteine-Cysteine Receptor 7 Promotes Fibrotic Injury in Experimental Post-Thrombotic Vein Wall Remodeling

AL Novel Lipid Droplet–Associated Serine Hydrolase Regulates Macrophage Cholesterol Mobilization
Young-Hwa Goo, Se-Hee Son, Paul B. Kreienberg, Antoni Paul ................................................................. 386

TH Carboxyl Terminus of ADAMTS13 Directly Inhibits Platelet Aggregation and Ultra Large von Willebrand Factor String Formation Under Flow in a Free-Thiol–Dependent Manner
Jialing Bao, Juan Xiao, Yingying Mao, X. Long Zheng ................................................................. 397

VB Clinical-Grade Human Neural Stem Cells Promote Reparative Neovascularization in Mouse Models of Hindlimb Ischemia
Rajesh Katare, Paul Stroemer, Caroline Hicks, Lara Stevanato, Sara Patel, Randolph Corteling, Erik Miljan, Indira Vishnubhatla, John Sinden, Paolo Maddeddu ................................................................. 408
See accompanying editorial on page 237
See cover

VB G-Protein–Coupled Receptor-2–Interacting Protein-1 Is Required for Endothelial Cell Directional Migration and Tumor Angiogenesis via Cortactin-Dependent Lamellipodia Formation
Syamantak Majumder, Mark P. Sowden, Scott A. Gerber, Tamlyn Thomas, Christine K. Christie, Amy Mohan, Guoyong Yin, Edith M. Lord, Bradford C. Berk, Jinjiang Pang ................................................................. 419

Clinical and Population Studies

AL Effect of Niacin on High-Density Lipoprotein Apolipoprotein A-I Kinetics in Statin-Treated Patients With Type 2 Diabetes Mellitus
Jing Pang, Dick C. Chan, Sandra J. Hamilton, Vijay S. Tenenti, Gerald F. Watts, P. Hugh. R. Barrett .......... 427

AL Effect of Mediterranean Diet With and Without Weight Loss on Apolipoprotein B100 Metabolism in Men With Metabolic Syndrome
Caroline Richard, Patrick Couture, Esther M.M. Ooi, André J. Tremblay, Sophie Desroches, Amélie Charest, Alice H. Lichtenstein, Benoît Lamarche ................................................................. 435

AL Changes in Ultrasound-Assessed Carotid Intima-Media Thickness and Plaque With a Mediterranean Diet: A Substudy of the PREDIMED Trial
Aleix Sala-Vila, Edwin-Saúl Romero-Mamani, Rosa Gilabert, Isabel Núñez, Rafael de la Torre, Dolores Corella, Valentina Ruiz-Gutiérrez, María-Carmen López-Sabater, Xavier Pintó, Javier Rekondo, Miguel-Angel Martínez-González, Ramon Estruch, Emilio Ros ................................................................. 439

AL Serum Hepcidin Is Associated With Presence of Plaque in Postmenopausal Women of a General Population
Tessel E. Galesloot, Suzanne Holewijn, Lambertus A.L.M. Kiemeney, Jacqueline de Graaf, Sita H. Vermeulen, Dorine W. Swinkels ................................................................. 446
AL Evaluation of Links Between High-Density Lipoprotein Genetics, Functionality, and Aortic Valve Stenosis Risk in Humans
Benoit J. Arsenault, Marie-Pierre Dubé, Mathieu R. Brodeur, Adriana Benjamin de Oliveira Moraes, Véronique Lavoie, Anne-Elen Kernaleguen, Sandra Guauque-Olarte, Patrick Mathieu, Philippe Pibarot, David Messika-Zeitoun, Yohan Bossé, David Rhainds, Éric Rhéaume, Jean-Claude Tardif ........................................ 457

VB Associations Between Dietary Patterns and Skin Microcirculation in Healthy Subjects

Notice of Retraction [Online Only] ........................................................................................................ e2
Corrections [Online Only] ...................................................................................................................... e3

On the cover: Representative laser Doppler imaging of mouse model of limb ischemia following cell therapy with neuronal stem cells. The ischemic limb of cell treated mouse has almost completely recovered as compared with the partial blood flow restoration of control mouse which received the vehicle. (See pages 408–418.)
