Correction

Correction to: Telomerase Reverse Transcriptase Deficiency Prevents Neointima Formation Through Chromatin Silencing of E2F1 Target Genes

On the cover: Blood–brain barrier disruption. Extravasation of Evans blue and decreased expression of tight-junction protein Claudin-5 illustrates the vascular damage and the breakdown of the blood–brain barrier 24 h post-MCAo in the striatal region (green indicates Evans Blue extravasation; magenta shows the overlay between endothelial cells and tight junction protein Claudin-5). (See pages 867–878.)
