Correction to: Telomerase Reverse Transcriptase Deficiency Prevents Neointima Formation Through Chromatin Silencing of E2F1 Target Genes

In the article by Endorf et al, “Telomerase Reverse Transcriptase Deficiency Prevents Neointima Formation Through Chromatin Silencing of E2F1 Target Genes,” which published in the February issue of the journal (Arterioscler Thromb Vasc Biol. 2017;37:301–311. DOI: 10.1161/ATVBAHA.116.308717), a correction was needed.

The authors recently realized that an incorrect Supplemental Figure IB was provided by accident. This does not alter the message of the Figure nor that of the article.

The authors apologize for the error.

This correction has been made to the current Data Supplement file, which is available at http://atvb.ahajournals.org/content/37/2/301.
