### Recommendation on Design, Execution, and Reporting of Animal Atherosclerosis Studies: A Scientific Statement From the American Heart Association

Alan Daugherty, PhD, DSc, FAHA, Chair; Alan R. Tall, MD, FAHA, Vice Chair; Mat J.A.P. Daemen, MD, PhD; Erling Falk, MD, DMSc; Edward A. Fisher, MD, MPH, PhD, FAHA; Guillermo García-Cardeña, PhD; Aldons J. Lusis, PhD; A. Phillip Owens III, PhD; Michael E. Rosenfeld, PhD; Renu Virmani, MD; on behalf of the American Heart Association Council on Arteriosclerosis, Thrombosis and Vascular Biology; and Council on Basic Cardiovascular Sciences **Online Only** .....e131

**On the cover:** A human venous thrombus within an arteriovenous malformation was immunofluorescently stained for von Willebrand factor (green) and erythrocytes (red). High-resolution imaging showed that von Willebrand factor significantly contributed to the structure of the thrombus, and von Willebrand factor localized between erythrocytes in venous thrombi.
