Correction

Correction to: Lymphangiogenesis Facilitates Initial Lymph Formation and Enhances the Dendritic Cell Mobilizing Chemokine CCL21 Without Affecting Migration **Online Only** e9

On the cover: Adenoviral delivery of ETV2 (ETS variant 2) increases vascular sprouting of aortic rings explants. Aortic rings from transgenic Sca1-GFP (green fluorescent protein) ApoE mice were stained by immunofluorescence for ETV2 (red). GFP⁺ cells (Sca1⁺) overexpressing ETV2 can be seen in the vascular sprouts. (See pages 232–244.)
